UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION II

DATE: JUN 23 2010

SUBJECT: ACTION MEMORANDUM: Authorization to Continue Technical Assistance Activities at the Cornell-Dubilier Electronics Superfund Site, South Plainfield, Middlesex County, New Jersey

FROM: Carole Petersen, Chief
New Jersey Remediation Branch

TO: Walter E. Mugdan, Director
Emergency and Remedial Response Division

PURPOSE

The purpose of this Action Memorandum is to request authorization to continue technical assistance activities at the Cornell-Dubilier Electronics Superfund Site, pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended. This work is being conducted by an Emergency Response (ERRS) contractor.

REQUIRED ACTION

OUI addresses residential, commercial, and municipal properties in the vicinity of the former Cornell-Dubilier Electronics facility. This action includes the temporary relocation of residents residing at six residential properties where sampling has revealed elevated concentrations of PCBs in interior dust and an interior remedial action will be performed.

A. Requested Project

The planned activities include the payment of per diem to residents during their temporary relocation.

B. Estimated Cost

To date, \$250,000 has been obligated to the ERRS contractor for this action. It is estimated that an additional \$10,000 will be needed to perform the work described in Section A, above.

C. Schedule

It is anticipated that the activities described in Section A, above, will be completed by September 30, 2011. The project and budget periods will run to December 31, 2011 to allow for completion of administrative and close-out activities.

RECOMMENDATION

I recommend that you approve the \$10,000 needed to continue the technical assistance activities associated with Operable Unit 1 at the Cornell-Dubilier Electronics Superfund Site, by signing below and the attached Procurement Request form.

Sufficient funds are available in the Region's special account established for the Cornell-Dubilier Electronics site.

I am available to discuss this recommendation at your convenience.
